Abstract		xi
Chapter 1	Introduction	
	1.1 Deoxyribonucleic acid	1
	1.2 Cell penetrating peptides	14
	1.3 Oligonucleotide peptide conjugates	18
	1.4 References	29
Chapter 2	Research aims	34
Chapter 3	Conjugation of 5'-dienyl modified oligonucleotides to Tat peptide <i>via</i> Diels-Alder cycloaddition	
	3.1 Introduction	36
	3.2 Results and discussion	42
	3.3 Conclusions	70
	3.4 Experimental	71
	3.5 References	87

Chapter 4	Conjugation of mid-sequence modified oligonucleotides to Tat peptide <i>via</i> Diels-Alder cycloaddition	
4.1	Introduction	89
4.2	Results and discussion	92
4.3	Conclusions	106
4.4	Experimental	107
4.5	References	122
Chapter 5	Generation of a potential biocatalytic DNA sequence for acceleration of Diels-Alder cycloadditions	
5.1	Introduction	123
5.2	Results and discussion	126
5.3	Conclusions	131
5.4	Experimental	132
5.5	References	138
Chapter 6	Oligonucleotide conjugation to Tat peptide <i>via</i> gold nanoparticles	
6.1	Introduction	139
6.2	Results and discussion	146
6.3	Conclusions	180
6.4	Experimental	182
6.5	References	193
Chapter 7	Conclusions	197

Appendix 1	Publication: ‘Oligonucleotide conjugation to a cell penetrating (TAT) peptide <i>via</i> Diels-Alder cycloaddition’	199
Appendix 2	Publication: ‘Quantitation of biomolecules conjugated to nanoparticles by enzyme hydrolysis’	206
