Acknowledgements

This thesis puts an end to the most transfiguring experience in my life. It represents not only four years of work, but also of life in Glasgow. I met lifetime friends, quite some interesting characters, learnt some English, and got married. All of it would not have happened without the support of MSD and SULSA that funded my project, and particularly Paul Hoskisson, who granted me his trust. Paul has become my “scientific dad”. He was firm when needed to, supportive when the frustration came and over all, very generous. Thanks Paul!

I would also like to express my gratitude to all the societies, agencies and companies that sponsored me with travel money, conference fees, reagents or software: The Society of General Microbiology, The Royal Society of Chemistry, SULSA, Santa Cruz University, Strathclyde University, FEMS and SnapGene.

Thanks also to everyone that shared my journey in the lab: Jana that helped me find my feet when I first arrived, for being a role model and a true friend, in the good and in the bad. For all the scientific chat and for that on Sunday August 2013. Kirsty, for your help with proteins, your tremendous cakes and your musical taste. Vartul, for all the advice. Danny, for the help when buying the HPLC column. Sarah, for being a mini-ION bae and overall happy lass that passes along the good vibe. Gab, for all the inappropriate jokes, the inappropriate novel, the inappropriate music and the inappropriate DVD. Thanks as well to my second supervisor Glenn Burley that helped me to grow a thicker skin and gave me ideas and assistance with the project. Thanks to Giacomo Padroni in his lab, and Fraser Scott, Abed Khalaf on Colin Suckling group that had the patience to teach me chemistry again (or try to). Thanks to everyone in HW601 for all the advice, and for turning the winter gloom into fun. Thanks Barath for getting me into the Indian culture. Thanks to Cesar, Ellie, Ali, Arrate, Ben for all the bizarre long nights. Thanks to Mireia and Martin for helping me to keep my wits about. Thanks to Tobsy who has (weirdly) become a very close person, and Avi to help me cope with him sometimes. Thanks Sara for the Daruma...it really did the job!

A big thanks for Mona, to keep up with me during the rough patches of writing and for being such a wonderful woman. Words do not make justice to her awesomeness.

Finally to my father, I wish he would be here.

Don Quijote a Sancho:

-...como no estás experimentado en las cosas del mundo, todas las cosas que tienen algo de dificultad te parecen imposibles...-... confía en el tiempo, que suele dar dulces salidas a muchas amargas dificultades...-

Miguel de Cervantes Saavedra
